

WHY IT MATTERS

- In 2018, Ohio had 43,000 fewer jobs due to occupational licensing.¹
- 18% of residents in Ohio require an occupational license in order to earn a living in their chosen profession.³
- Burdensome licensure laws drive up prices without improving the quality of services. The cost of hiring a licensed worker is 15% higher than an unlicensed worker with the same level of experience doing the same job.³
- Entrepreneurs looking to enter an industry or expand an existing business are stifled by these artificial limits.

OHIO ranks

in the

for burdensome

NATION

LICENSING LAWS²

FIXING THE SYSTEM

IT'S TIME FOR OHIO TO END ITS PERMISSION SLIP POLICY ON JOBS

REMOVE REGULATIONS

1

Codify that Ohio will seek the least restrictive regulation when it comes to promoting real and definable public safety concerns.

2 ESTABLISH SUNSET REVIEWS

Provide for a regular sunset review of current Ohio boards and commissions that license occupations.

ASSESS NEW LEGISLATION

Provide for a sunrise review to determine whether new licensing legislation meets or runs afoul of the least restrictive regulation.

BI-PARTISAN CONSENSUS

Both Democratic and Republican administrations have called for reducing these burdensome licensing requirements.
