Education Savings Accounts (ESAs) offer an innovative and commonsense policy solution and provide a cost-effective way for state governments to manage their education budgets.

**THE PROBLEM**

Children in low-income families—particularly those in rural and urban areas—are at increased risk of falling behind their peers. The pandemic impacted all parents—who desperately need support, certainty, and flexibility to ensure their students’ success—regardless of their school district. Ohio must act now to catch up and give our students the tools they need to excel educationally.

**THE SOLUTION**

ESAs help parents afford desperately-needed resources and offer the flexibility necessary to improve their children’s educational outcomes.

ESAs offer an innovative and commonsense policy solution and provide a cost-effective way for state governments to manage their education budgets. In addition to traditional tuition expenses, ESAs can be used to purchase laptops or other technology for distance learning, tutoring services, or supplemental material to augment existing curriculum. 66% of parents with a child at home agree that a portion of funding should follow students.
