

Ohio by the Numbers—May 2013

Private-Sector Job Recovery

Ohio's employment peaked in March 2000 at 4.85 million jobs. Using job-growth rates from the '90s boom, employment would not return to that level until October 2017. Most likely, full recovery won't happen until the early 2020s. Please note, these numbers are using adjusted BLS data going back to 1990 that became available in March 2013.
